Reaction to fire
 B-s1,d0
 Based on EN 13501-1

Cleaning

- Frame: Vacuum, damp cloth, and low pressure foam cleaning
- Canvas: Vacuum, damp cloth, and washing in normal machine wash cycle up to 40 degrees

Hygiene
 Stone wool provides no sustenance to microorganisms

Recyclability
 Fully recyclable stone wool

Indoor environment
 Rockfon Canva has a low release of VOCs. Rockfon Canva Island has been awarded the Finnish M1 emission classification for building materials and the Danish Indoor Climate Label for low emission products.

Material Health
 All materials used in Rockfon products are screened against the list of substances restricted under REACH or recognized as Substances of Very High Concern (SVHC) on an ongoing basis. Rockfon stone wool fibres comply with the safe fibre EU regulation and hold an EUCEB certification.

Custom graphic options

Contact your local Rockfon partner to get your choice of image, artwork, graphic design or other visual layout on the canvas surface in high resolution quality print.

All standard colours are printed on the textile with a texture weave pattern. The Canva surface colours are close textile colour matches to the Rockfon Color-all® products. Colours may vary slightly between different production batches. Reproduction of colours may vary between print and reality. Please note that black frames combined with light coloured canvas can create a shadow effect close to the Canva. Surface textile in 'Mercury' colour does not have a metallic appearance.

The Rockfon Canva textile has a "visual direction". This means that the colours might differ depending on whether the element is suspended in portrait or landscape orientation.
